Merry Gathering at Whiteman's

At the home of Mr and Mrs Cyrus Whiteman, Friday, Sixth of December, was the scene of a merry gathering. The evening was spent dancing and playing games. The strength test was won by Mr Koenig taking on allcomers. As the dance was nearing, the best wishes were heartily exchanged. Among those present were Minnie Lomax and Elsie Lippman, Marie Thompson, Mary Chisholm, Christine and Margaret Peller, Katie and Dolly Walker, Mabel Whiteman, Mamey By Topoff, Bill Walker, C Whiteman, A Davis, W Sharp, Bill Peller, Val Peller, Mr and Mrs Val Peller etc.

Hockey News.

At the game here Sunday last the unexpected happened. Following the contest here on the 21st, when the Bisons tied with the Flying Frenchmen, it was figured St Albert was a no much better team than Stony wouldn't have a look-in. The contrary proved to be the case, as the final score showed: Stony 2, the visitors 1. Goals for Stony: L O'Leary 1, Batten 1. Stony has won team this season, and should finish the series unbroken. Stony meets the Saults again on Sunday, Jan. 11 on St Albert ice, and the game should be worth the trip up there, to see it.

The U. F. A. Convention.

The 1931 annual convention of the United Farmers of Alberta will be held in Calgary on Tues. to Friday, Jan 19 to 22. While in the past it has been the custom to alternate the conventions between Calgary and Edmonton, it was felt by the members of the Executive, when they met in Calgary last week that it would be more convenient and less costly both for the organization and the majority of delegates who will attend the convention, if it were held in Calgary, which also entertained the delegates in January last.

Jack Barrie Returns North
Peace River Board: A gentleman who had been priviledged to have had in the earlier days of the West a pioneer and editorial career related in this district last week. This was Mr John A. Barrie of Edmonton, who was here in the interests of an implement firm. Mr Barrie said it had been thirty years since he had visited Peace River country. At that time, being a member of the N.W.M. Police, he came from Fort Macleod where headquarters to Peace River with a companion on a mission to make a treaty with the Crees. From 1888 to 1892 Mr Barrie was stationed in the Yukon. The wonderful progress made by this country since his last visit appalled greatly to Mr Barrie.

Best Wishes for
the New Year!

Wheat.

Wheat, at the present time, looks larger in the eyes of the people of Canada, in the east, as well as in the west, than ever before. The word "wheat" is on everybody's tongue; it is the outstanding subject discussed by railway executives, bank presidents in their annual statements, manufacturers, wholesalers, shippers and politicians great and small. If never before, the Canadian people have now awakened to the fact that wheat is the most potent factor in the commercial, economic, financial life of this Dominion; that it is the country's very life blood upon the flow of which its prosperity, if, indeed, not its present existence depends.

The industries of Eastern Canada languish because western agriculture is in difficulty, severe difficulty. The east is beginning to remember, what perhaps it had forgotten, that in years past, when its cities and towns were growing in population and wealth, when its factories were busy and working overtime, when new industries were being established and large additions to plant made to existing ones, were the years in which western Canada was prosperous. It was the enormous new and increasing purchasing power of the west that made eastern industry live.

Now that western wheat is in the doldrums, a drag on the world's markets, which it is impossible to sell at a price that will even cover the costs of production, not to mention any profit to the producer, the whole country is suffering. This condition cannot long continue; it must change, and because this is so, because a way out must be found, and therefore will be found, western farmers can ascertain hope for the future.

What's happened to Canadian-grown wheat on the market, it still retains its pre-war quality. To remain the best wheat in the world, and because this is so, the present situation is all the more tragic. The outstanding quality and pre-eminence of western Canada's wheat was again demonstrated this year from once again the world's championship was won by an Alberta farmer.

It is twenty years since the wheat championship competition was inaugurated, and during those twenty years the three prairie provinces of Canada have carried off the championship no less than sixteen times. Saskatchewan, winning it five times, Alberta five times, and Manitoba once. In the other four years the former went to all individual states across the U.S. - Montana.

This is a wonderful record for western Canada. It speaks volumes not only for our climate and the fertility of our soil, but for the enterprise of our farmers, their patience and skill. It has meant the use of good seed; it has given an impulse to the art of scientific cultivation; it has meant millions of dollars to hundreds of farmers whose names never appear in the prize-winning class, but who have been encouraged to adopt and follow right methods and to sow only good, clean, registered seed in their fields.

It has added vigor to the fight against noxious weeds, insect pests, rust, and other factors operating against the production of the highest quality wheat. It has encouraged the scientists in their task of developing new and better varieties, earlier ripening varieties, frost and rust resistant strains.

These things may be the innocent basis of little account to hundreds of farmers who are making a real struggle to meet their obligations and feed the necessities of life for themselves and their families. But the fact remains, that the industry of agriculture in western Canada rests on a solid and enduring foundation; it is the superstructure involved in present production costs, transportation costs, marketing difficulties, general world conditions over-production and loss of purchasing power where the trouble of today lies. These things can, must, and ultimately will be rectified.

Approved Federal Plan

Market Control Authority

Storage Policy For Auctioneers

To Livestock Marketers

An approved plan, recommended by the federal minister of agriculture for advancement of the livestock industry, by a limited distribution of cattle, was voted in unanimously passed by the Alberta Provincial Livestock Marketing Association at its annual convention at Red Deer. The proposal to purchase several of the best stallions of draft breeds and the service of the bull-testing policy were recommended as well as reorganization of the independent provincial marketing policy.

W. H. C. 1937

Note To Cattle Exhibitors

Actions by Stewards to Banish All Women from Exhibitions

Plans give to prospective cattle exhibitors at the World's Fair Exhibitions and Conference at Regina in 1932 by Capt. Thos. secretary of the British Columbia committee, include the following: (1) Exhibitors must reach Regina by or before March 1st, 1932; (2) Transportation charges must be prepaid; (3) All exhibits must bear the name of the exhibitor. This is given omitted at fairs, causing confusion, confusion and loss of time; (4) Only one entry may be made in any one class, although exhibitors may enter in as many classes as desired; (5) Exhibitors may be taken away, pay your own.

Radio in Canada

Proposed by Radio in Increasing According to Different Areas

The radio is increasing increasingly popular in Canada. In the first eight months of this year over 1,000,000 head of cattle have been taken out than in the preceding year.

The figures are: 1930 - Eight months, 445,678. 1931 - Nine months, 500,000.

There are still four months to go and officials of the radio department believe November may reach the total of 600,000. Head license costs \$1.40.

Manitoba shows a greater increase than either of the other two prairie provinces. In this year 27,800 license have been issued in Manitoba, against 26,400 last year.

In Saskatchewan the figures for this year are 26,500, against 26,500 last year; in Alberta, 26,500, against 21,478.

Winnipeg records the greatest advance among the cities with 18,900 licensed as for this year, against 15,400 last year. The figures for Regina are 3,100, against 3,000; Moose Jaw, 2,670, against 1,800; Moose

Lake, 3,000, against 1,672.

Discreet Business Practices

Canadian Investigator Says No Trade Secrets Are Stolen

Integrity and secrecy are the characteristic features of the Russian people in their business and social experiments they are making, says Dr. A. G. Lockwood, agricultural investigator of the Dominion Government Experimental Farm at Ottawa, following a visit to the Soviet Republic. The Russians firmly believed wheat, they are adding oil, will give the greatest good to the greatest number," he affirmed. "They believe the rest of the world will, of necessity, follow their methods."

Dr. Lockwood was Canadian delegate to the second international congress of oil scholars at Leningrad and Moscow. Every line of scientific research appears to be encouraged in the Soviet, he says.

The recent embargoes by Russia of wheat, hemp and coal on world markets is essentially an effort to raise credit, rather than a deliberate part of a market-breaking scheme, Dr. Lockwood opines. In this connection, he believes the message from the U.S.S.R. is not at present serious.

Fastest Warship Launched

Nothing Can Outdistance Destroyer Built By British Navy

The New York Times publishes the following special cable from London, England:

What is believed to be the fastest warship in the world has just completed her trials for the British navy, reaching a speed of 44 knots at times without pressing her machinery to the limit.

This is the new destroyer *Flotilla Leader*, "Cdr. Flotilla," 1,020 tons, completed last June at the Swan and Hunter shipyard in Glasgow.

Nothing in the other service have been produced to out-distance this British whippet, which with a full load could streak across the Atlantic in three and a half days if top speed could be maintained.

Miller's Worm Powder will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and overcome these as speedy cases of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. With no stirring a remedy at hand no child should suffer an hour from worms.

Shipping Long Distance

One of the longest flights in the world, Nanking Berlin and Tokyo, is a possibility, according to reports reaching here from the Japanese Aviation Bureau of the Ministry of Communications. The line as proposed now would be operated from Tokyo to Hong Kong by the Japanese, over India by England, and the rest of the way by Germany.

Where Women Predom.

In Europe, there are 10 million more women than men, according to a statistical calculation. Germany has 2,600,000 more women than men, France 2,000,000, and Russia, 1,400,000. Portugal is destined to approach where women form the largest proportion of the population.

Time Of Empire

How Men Never Show Strength In The Days Of The Empire

"It is unthinkable that we should lose Canada, and if the Dominions had her they surely would be little danger," declared Mr. William Crawford, president of the Publicity club of London, England, which discussed the question: "Shall we lose Canada?"

"An era like in the history of our country," said Mr. William, "has the ideal of empire been stronger in the hearts of our people."

The meeting was adjourned by P. W. Field, his majority's junior under-secretary in Canada and Newfoundland. Mr. Field said British exporters must expect increasing competition from Canadian producers in many fields and he showed that the United States exercised a great influence over the Canadian market.

The Americans had established a Standard factor in the Dominions and, in the face of this increasing competition, only the most efficient business methods by British firms

would enable Britain to remain in the field.

Mr. Field agreed that Canadian trade changes which had come into operation since May would, undoubtedly, help British business, but he believed it was still possible to obtain a large share of Canada's export trade by strengthening, and revising methods.

A New Era Of Co-Operation Between Canada And U. S. In Air Service Development

A new era of co-operation between Canada and the United States in the development of air services began when plans for the inauguration of new passenger and air mail lines were announced at Ottawa. The announcement came following a conference between P. T. O'Callahan, assistant deputy postmaster-general of Canada and W. Irving Glover, assistant postmaster-general of the United States.

If the decisions reached by the two postal officials are approved by their respective governments, Canada will have a regular air service from coast to coast linked up at important points with the trans-continental air lines of the United States. In addition a north and south line from Alaska to Florida is contemplated.

The speeding up of trans-Atlantic mail service was also discussed, but at this point the programmes of the two countries are quite distinct. Canada will effect a saving of 48 hours in the present transatlantic service by ship to short flights, while the United States is planning an all-air route to Europe from New York via Bermuda, the Azores, Lisbon, Portugal and through France to England.

The best link in an air line which will traverse the entire length and width of North America from Miami, Florida, to Alaska, will be inaugurated shortly. It will run from Calgary to Miami and it will be possible to travel between the two points in 48 hours, a saving of 36 hours over present methods of communication. Eventually it is hoped to extend this route from Calgary north and eastward into Alaska by way of Fort McMurray and thence into Asia.

The first step in the programme has been taken with the definite decision to put into effect an aerial link between Winnipeg and St. Paul-Minneapolis.

While the details of the Winnipeg-St. Paul schedule were being worked out the officials were also discussing the more ambitious scheme to develop a route from Calgary, through Fort McMurray into Alaska, and thence into Asia. It was agreed that under Canada and the United States joined in the development of the Arctic route, a few years might see serious competition from Russia in that region. Russia is making considerable strides in aviation. Mr. Glover said, and 27,000 miles of flying is being done in that country daily.

Three years are regarded by the officials as sufficient time to bring the Arctic service into being. In the meantime definite progress is being made. Mr. O'Callahan said, to set up aerial communication routes from Calgary to Vancouver. The route through the Rockies was not, he said, regarded as particularly difficult. As soon as communication is established to the coast by air, new links between Canada and the United States would be made at Lethbridge, Alta., and Vancouver. The Lethbridge link will be to Great Falls, Montana, while the western extremity of the United States system will be connected at Seattle from Vancouver.

The flights arranged between Winnipeg and St. Paul will complete the aerial chain between the prairie and the east. Mail for eastern Canada will be carried over United States air lines to Detroit and will then re-enter Canadian territory. While the schedule has not been definitely settled, Mr. O'Callahan said that mail from Calgary would reach Montreal in 48 hours, a saving of 36 hours. A saving of 48 hours would be effected in mail for Toronto.

Low Wheat In Britain

The British ministry of agriculture reports that England's wheat production for 1930 was 32,494,000 hundred-weight, which is 4,000,000 hundred-weight or 1% per cent less than last year's crop. Virtually all grain production was shown to be under last year's figure with barley dropping 2% per cent, and oats, 1%.

A grain delivery in Athlone, B.C., yesterday saw tons of barley a day, in years less than 1,000 acres and stumps.

This Complete Life

Man, With All His Inactivity, Cannot Solve Economic Problems

Man can take a drop of blood and tell the story of his owner's death by the discovery of the presence of a minute particle of poison; man can drive the car without touching the gear; man can kill other men twenty miles away; man can weigh the stars of Mercury; man can drag oil from the bowels of the earth; man can control an icy waterfall to seek his needs; man can travel a hundred miles from the storm; man can print a million newspapers in an hour; man can breed the seeds out of oranges; man can make a hen to lay three hundred and fifty eggs in a year; man can persuade dogs to smoke pipes and use them to play guitars. Man, in other words, is quite an ingenious and remarkable package of physical and mental machinery.

When this astonishing person, however, is confronted with the problem, he retires, shamed, to his bed. There his sit, mope, waste away, and die, leaving to new who cannot use it, but who want money for it, and tell him how the sit hungry man did he get in possession of the sit, empty leaves, and watch him there! It is then that man abandons consciousness, and appeals continually to his doctor, and makes speeches and cries out that a crisis is upon him, and down a score of useless things, and then retires, defeated, to his bed, leaving in the dimming twilight the tokens of the sit hungry man and the sit, unapproachable leaves.—The Western Producer.

Canadian Farm Loan Board

About Seven Million Dollars Disbursed To Farmers In Six Provinces

At the end of the present fiscal year on March 31st next, when the organization will have been functioning a little less than two years, the Canadian Farm Loan Board will have disbursed nearly \$7,000,000 in loans to farmers in six provinces of the Dominion, according to Dr. J. D. McLean, chairman of the Board. Up to the present the average loan has been a little over \$2,000 and it is planned out by Dr. McLean that back of the \$4,400,000 loaned up to the end of September, the Government has securities in the form of land and buildings valued at about \$46,000,000.

Western Canada Turkey Show

The first Western Canada A.R. Turkey Show, held at Duncan, B.C., the other day, was a marked success, there being several hundred people present.

Eskimo Maid Is Crowned Beauty Of Arctic Circle

Esquimalt, 24-year-old beauty, is the reigning beauty of the Arctic. Andrew Brown, the big face and figure man of the north, selected this brown-eyed, brown-skinned Eskimo girl from an entry of two dozen. In the first beauty contest ever held inside the Arctic circle.

From Baker Lake, little Esquimalt went to Chesterfield Inlet, just a thousand miles north of Winnipeg, name-word of Esquimalt's triumph. "White Star," her name means and proudly, for the first time in her life, she can survey her prize-winning features. A mirror was her reward, the first she has ever owned.

Brown, who organized the contest, declares Esquimalt the most beautiful Indian lady he has ever seen. His first visit to Baker Lake, — Photo Canadian National Railways.

Place Order For Equipment

C.P.R. Lets Contracts For Both Passenger and Freight Cars

Orders have been placed by the Canadian Pacific Railway for the construction of 26 passenger cars and 425 freight and service units. It was announced at Montreal.

The Canadian Car and Foundry Company will build 26 baggage and express cars and the steel Pressed Steel Company of 46 other passenger cars, interiors of which will be finished in the company's Angus shop.

Forty-five gasoline and 30 air-dump cars will be built by the Canadian Car and Foundry Company, while 200 refrigerator cars will be constructed by the Montreal Steel Car Company and 907 flat cars by the Western Car Company.

In addition to the above, three snow-plow and 20 tank cars will be constructed by the company in its own shop.

Fertilizer Plant

Good progress is being made in connection with the fertilizer plant of the Consolidated Mining and Smelting Corporation, Ltd., at Warfield, B.C. Some of the buildings are now nearly completed and in one or two cases, machinery is already being installed.

Estimated Age Of The Earth Is Advanced From Time To Time As Scientific Knowledge Increases

Complete Stone Survey

Geological Survey of Many Countries

Return to Ottawa of Lawrence E. Knott, of the economic branch of the Department of Agriculture, marks completion of the field work in the economic survey of the stone resources of Canada which is being carried out in co-operation with the experimental stone branch.

Mr. Knott has visited sections in southeastern Saskatchewan, Alberta and the interior of British Columbia. Complete records were obtained from 144 representative mining districts for the year 1929 and 34 for the current year.

Field work of the survey — the studying of facts and figures secured by observation and contact in the field and preparing conclusions therefrom — will now start and it will take two or three months to carry out the plan.

To Study Economic Conditions

Geographic Data Will Promote Research Council Undertake Work

The suggestion that a committee of the National Research Council study economic and international aspects of numbers having a bearing on preventing depressed economic conditions was held out recently by Tom Moore, president of the Trades and Labor Congress of Canada. In an address to an Ottawa Service club Mr. Moore said research showed that the Dominion is without a co-ordinated authority of this sort. In this regard, it was important that the country keep abreast of the times.

Agricultural Breeders' Association

Surveyory of Canadian Organizations

Green Report For November

The secretary of the Canadian Agricultural Breeders' Association reports that during the period from November 1st to November 25th, he received 31 reports of cows and bulls that qualified in the E.O.P.—25 in the 365-day division and 66 in the Holstein Red or 365-day division. In the former, 13 qualified in the mature class; five in the two-year-old class; six in the three-year-old class and nine in the two-year-old class. Twenty-eight of the records were made on two milking a day.

British Columbia Tourism

Twenty-three thousand dollars, representing the proceeds of this year's tomato crop in the Oliver section of British Columbia, were distributed to growers by the Dominion Canadas Limited. The average production was 74 tons to the acre, for which the growers received \$17.89 per ton.

The estimated age of the earth has been growing at a striking rate over more geologic intervals. In 1901, John Phillips placed the age of the globe at 60,000,000 to 90,000,000 years. Three years ago he helped figure out both substantially enlarged by geologists. But the end was not yet. Radiation was discovered and when found that the element beta had a radio-activity rate that is incalculable. Geologists observed the rate of disintegration in various rocks and multiplied the previous estimate by ten.

When this remarkable figure received an age estimated at no less than 300,000,000 years, Prof. Louis V. Priest remarked: "Truly there is now an embarrassing amount of time." But this did not stop science from inflicting further misery upon Mother Earth. The latest estimate of Miss since a passing star left the surface of the sun is 2,000,000,000 years. This figure used by astronomers is now substantiated by Prof. Alvin F. Kevern, of the Yale physics department. Prof. Kevern's measurements of the constant disintegration of radioactive elements in a piece of radioactive indicator give an age of 1,800,000,000 years.

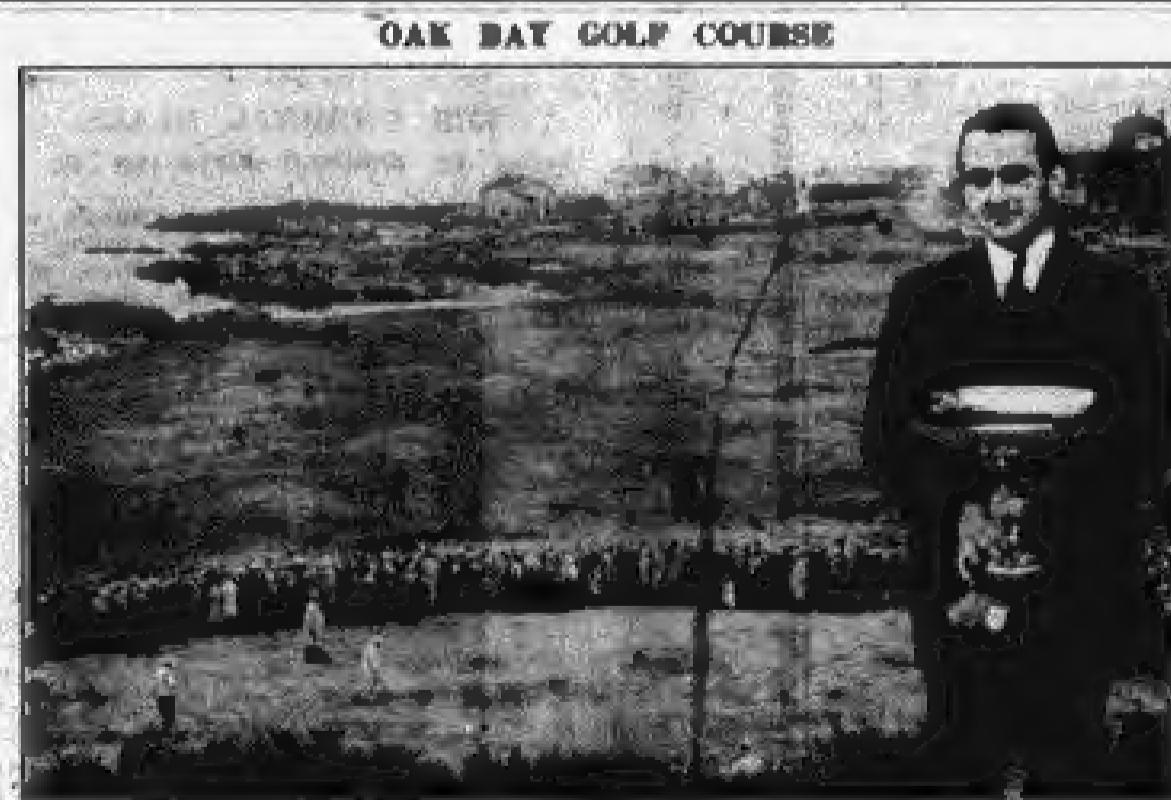

Many geological "time-scales" have been used to estimate the longevity of this planet. One favorite, measuring time in the rock strata that are supposed to mark epochs in the Grand Canyon of the Colorado. The degree of evolution attained by fossils found in some of these strata are formidable evidence. But the sequence of rock formation is frequently broken, and it is impossible to determine how much time has elapsed between the formation of successive layers. Geology postulates that most of the earth's surface has been under the sun a number of times, and it is probable that some millions of years would elapse from one inundation to another.

The measurement of recent time the rate of erosion is useful. For example, the average level of the United States is being lowered at the rate of one foot in about 7,000 years. On this basis it is estimated that 15,000,000 years would be required to reduce the continent to sea level by erosion if the topography by which mountains are made were stopped.

The layout is not much interested in these figures, or in the technical processes by which they are worked out. But he may find some comfort in the fact that the earth is not a recent creation, and that its present form will probably be modified but little in the next million years. No one knows how long life has been on the earth, but, of course, the life of man is only an infinitesimal span in comparison with the length of time since this sphere came into being. The important thing seems to be that man, now that he is here, is determined to stick with the old globe as long as it continues spinning. — Washington Post.

Good wishes also come home to road.

India has 17 different calendars, all recognized by the government.

The Oak Bay golf course on the northern coast of Vancouver Island, which will become the center of interest for western Canadian golf when the annual British Mid-Winter Golf Tournament for the K. W. Beatty Trophy takes place February 20-21. Left, George, 20-year-old son of the golf course and driving range, and right, Billie, 18, winner of the Beatty Trophy, playing over the Old Course, and who this year will defend his title under vastly different conditions.

Wife: "If I had to go away for some weeks would you be lonely?" Husband: "Not at all." Wife: "Good, then I won't go." — Shreveport, Louisiana.

WORLD HAPPENINGS
BRIEFLY TOLD

H. C. Morris, secretary to the government-general of Canada, will proceed to India with Lord Willingdon to his new post.

World-wide reduction of armaments is an obligation under the terms of the Treaty of Versailles has been urged by the Carnegie endowment for International peace.

In a recent month automobiles registered in England numbered 17,466, an increase of 726 over the corresponding month of the previous year.

A man beat a horse in a 10,000-meter race at Tuxtla, Chile. The victor was Felix Barreiro, an Andean Indian. He led the horse by 300 meters at the finish.

Dr. Arthur Tansley, of London, England, fellow of the Royal Society of Great Britain, has announced plans for an expedition to Africa to Africa, in which he said he hoped to determine the origin of the race.

An official return just issued shows that the majority of the 328 pilots attached to the Port of London, England, had not average incomes approaching, or more than, £1,000 during 1929.

Professor Werner Brückhardt, with a European assistant, fell into the crater of the volcano Merapi in Sumatra at the present that it became suddenly eruptive, and perished in the boiling lava.

Michael Flinnerty, 104 years of age, died at Duncan, B.C., December 26. He was one of British Columbia's pioneers, having resided in the province for 67 years, the greater part of which was spent on Vancouver Island.

Twenty-six thousand one-pound cans of freshly packed salmon were donated to Seattle's needy citizens as a general relief program was launched there to aid the destitute and unemployed. The salmon—12 tons of it—was donated by salmon packers and distributed by welfare organizations and institutions.

Novel Type Of Vehicle

One Man An Oarsman On Rubber Tires Or On Railway Track

A novel type of vehicle adaptable for either road or rail, which is to be tested within the next few weeks near London, England, may revolutionize transport methods.

It is manufactured by a Huddersfield firm of commercial vehicle makers.

Whilst on the road it resembles an omnibus and runs on rubber tires. In 20 seconds railway carriage wheels can be fitted, and it will travel on the track at 60 miles an hour.

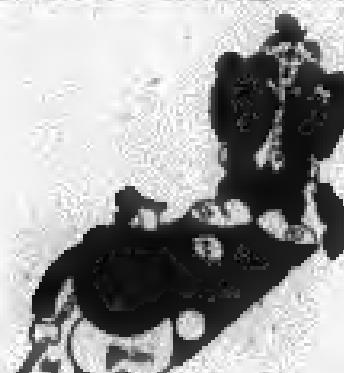

The London, Midland and Scottish Railway Company are co-operating with the firm in the tests.

Berlin-Moscow Air Service

The Berlin-Moscow and Berlin-Leningrad daily air service has closed down until next spring. During their operation 3,000 passengers were carried, 25,345 kilogs of mail and 66,000 kilogs of freight, an increase over the previous year of 12 per cent. in passengers, 50 per cent. in mail, but a decrease of 30 per cent. in freight.

Tree Plantation Inspections

The inspection of tree plantations went out from the Dominion Forest Survey Station, maintained by the forest service of the Department of the Interior, at Indian Head, Saskatchewan, made 13,000 inspections during the 1929 season.

"Why didn't you receive the ... January 1st?"
"I was in my boat when you called."
"We are speaking of this year."
—Answered Answer, Paris.

The River Can Tell

We Shout River Shout You Tell You
May Be Able To Tell Me
Wonders

The death has taken place of W. H. Ross McQueen, an Irishman, at the age of 60, who retired from the British civil service in 1919, on the advice of his doctor that his health would not stand the strain of serious work.

There is a bachelor named James Underhill, of Wolverhampton, England, now in his 80th year, who, seventy-five years ago, was refused insurance of any kind. Mr. Underhill rode a bicycle until he was 82, played the fife in public at 80, survived an attack of pneumonia the same year, broke a leg and made a good recovery at the age of 84, and up to the present year transacted his business, sometimes signing documents at the rate of one hundred an hour.

A layman has to place reliance on what his doctor tells him. But these cases just show that even if that worthy man you have can rest in the grave, there may be a few good kicks left in you yet.

GAY YOUTH

All Tingey models are created and sketched in Paris and the patterns are made in New York.

What bright young thing of school-girl age does not revel in brilliant color? "Navy's a one!"

Here is something to cheer the heart of many a bonny lass. It is a model youthful and dashing in cut and color, and includes at the same time a great deal of charm.

Scarlet wool maccaroni or crepe-like silk original. The collar and cuffs were of very pale beige—almost cream crepe de chine (very thinning silk would be suitable) while the body was beige spotted scarlet.

Similar sketches in navy and white, green and white or beige, blue and red, etc., would be smart. Other maccaroni and suitable materials include silk maccaroni, heavy crepe de chine, fine woolen felt, maccaroni, jersey, etc.

This pattern may be obtained in sizes 2 to 11. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or cash) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Inter-Siberian Trade

Inter-Siberian Trade, St. Petersburg, Russia
We Conference To Be Held At
Moscow

Acted in the British House of Commons about the British government's intentions in regard to the subject of Empire reciprocal tariff preferences and the Ottawa economic conference with year, J. H. Thomas, secretary for the Dominions, declared the government was taking further steps to study the problem of closer economic co-operation within the dominions.

Regarding the scope of the Ottawa conference, Mr. Thomas invited the House's attention to the resolution recommended by the Inter-Imperial conference by the heads of delegations, dealing with the preparations for the Ottawa conference. This act, forth that while matters left over by the Imperial conference would be dealt with at Ottawa, the Ottawa conference would not be limited to such subjects.

We Give More Wheat

Soviet Russia Contemplates Increasing Wheat Average

The United States Department of Agriculture was informed that Soviet Russia contemplates an increase of 10 per cent. in her wheat acreage to be seeded next spring above this year's total.

The foreign agricultural information office of Berlin advised that the present situation of Russia called for seeding 136,807,000 acres.

The acreage sown in Prussia and Germany up to the early part of December was reported as 4.6 per cent. greater than a year ago; but a decrease of 10.2 per cent. was noted in Germany's rye acreage.

Crop Insurance

New Legislation To Be Introduced To Saskatchewan House

Legislation to empower companies that so desire, to write crop insurance along the lines of hail insurance, will be introduced at the coming session of the Saskatchewan legislative assembly.

Arrangement to this effect was made by Hon. J. F. Bryant, M.C., minister in charge of the Saskatchewan insurance act recently. Crop insurance has been widely discussed by the farmers of the province and has led to the government move.

Rail which can be used in making brown and amber glass is obtained from the Pacific Coast, but for white glass sand is still chiefly imported from Belgium.

—

SUNDAY SCHOOL LESSON

JANUARY 4

THE BIRTH OF JOHN THE BAPTIST

Golden Text: "Thou shalt go before the face of the Lord to make ready His ways."—Luke 1:76.

Lesson: Luke 1.

Devotional Reading: Luke 1:69-78.

Scripture and Comment

The Preface to Luke's Gospel version 1-4—Luke himself, he tells us, was a careful historian, who obtained his information from those who were eyewitnesses of the events he records.

The Birth Of John The Baptist, version 6-18—When the time came for Zacharias' group to officiate in the temple, lots were cast, as was customary, to determine which priest should offer the incense. "No priest might leave this house twice; and the number of priests was so great that many never offered the incense." The burning of the incense was "the highest mediatorial act, the most solemn part of the day's service, symbolizing Israel's accepted prayers," and the priest who had this privilege was ever afterwards called "rich." The coveted lot fell to Zacharias.

When Zacharias entered the Holy Place, the people stood without in the temple court, praying. The altar of incense was in the Holy Place in front of the curtains which shut off the Holy of Holies. On its right stood the table of shewbread, and on its left the golden candlestick. The two assistants whom Zacharias had chosen, as was the custom, each performed the part assigned to him; one removed what had been left on the altar from the service of the evening before and departed backward. The other spread five coals on the altar and then left. Zacharias was alone. He advanced with the golden censor and spread the incense on the glowing coals. At that solemn moment, our record says, an angel of the Lord appeared unto him.

"Do not be afraid of mighty ministers!"

God sends the angels, they send bring the eyes."—Langbridge.

Zacharias was troubled and fearful. "Fear not," were the words he heard, and then came the promise that because his supplication had been heard he should have a son whom he should call John. "John," means Jehovah's Gift, or God is Gracious. Although Zacharias had, all doubt, often prayed for a son, it is natural to suppose that his prayer in the temple at this time had been for the coming of the Messiah, whose herald the son was to be. Dr. Plummer comments that the "and" (and thy wife shall bear thee a son) may mean that this is an additional fact, which is to prepare the way for the blessing prayed for and granted; and that, like Solomon, Zacharias received the higher blessing for which he prayed, and also the lower blessing for which perhaps he did not pray at this time.

The Character and Mission Of John, version 14-17.—The son promised to Zacharias would bring joy and gladness not only to him but to many, for he would be truly great—great in the sight of the Lord.

Static Stopped.
Radio Cooking

Introducing Electrolux By Electrolux
Winged Wheel At Critical Moment

Radio cooking static made its first public appearance in New York recently.

It interferred with popping a bag of corn in the presence of 1,200 guests at a luncheon of the New York Merchants' Association.

Just before the luncheon the radio cookstove was working perfectly under the direction of General Electric Company wizards. A test paper such as corn placed between two jars of ice water to make sure there was no warmth in the air, popped perfectly by the heat generated within the kernels by radio.

But at the luncheon to the expectant hush of the audience something went wrong. It was just what might be expected of static. No corn popped.

Frozen Light, one of the queer new discoveries of science, also was exhibited and worked perfectly.

This light was frozen into the surface of a mineral screen at Schenectady and brought to New York in a bottle of liquid air at 312 degrees below zero.

The screen, lifted up before the diners in darkness, was at first just a black dot. But as it thawed its face burst into all the colors of the rainbow, which chased each other across the surface in luminous billows.

A Striking Phrase

Sir Robert Borden Uses Striking Sentence At Meeting Of League Of Nations

A phrase used by Sir Robert Borden, Canadian delegate to the just meeting of the League of Nations assembly, was repeated in the British House of Commons by Hugh Dalton, under-secretary for foreign affairs.

One of the most striking phrases used at Geneva during the debate was that of Sir Robert, who, returning after a 12 years' absence, looked around him and said: "The nations seem all to have renounced war, but they have not yet renounced armaments."

"That went to the root of the matter," Mr. Dalton added.

Milestone Egg Laying Contest

White Wyandottes owned by W. T. Baker, of Brandon, led the milestone egg laying contest at the Brandon experimental farm at the end of the third week. This pen, led for both total and weekly production, the total being 84.2 poults and 83 eggs.

Make Your Windows Pay

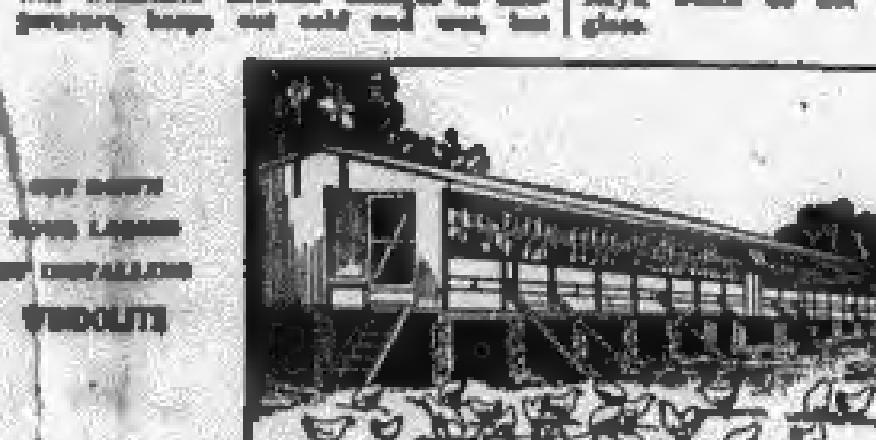

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Livestock

WINDOLITE

MADE OF GLASS—SILVERED SINCE 1911 ON ORIGINAL PATENT

This milestones glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, has

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg-weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls one-half inch wide only.

NEW AIR MAIL LINK THROUGH U. S. ARRANGED

Ottawa, Ont.—With the approval of the government of an arrangement between post office departments in Canada and the United States for a new air mail link between Winnipeg, Minneapolis and St. Paul, plans are being pushed forward for a service that will shorten by two days the movement of mail between Eastern and Western Canada. An announcement came as a climax to negotiations which have been going on for some weeks between P. T. Costello, Canadian assistant deputy postmaster-general, and W. L. Glover, assistant postmaster-general to the United States.

The agreement between the two countries solves the problem that has arisen as a result of the difficult flying area between Manitoba and Ontario points. Mail will now reach Eastern Canada from Winnipeg via St. Paul, Detroit and Toronto.

The new flights are expected to begin about February 1. Mail will be transferred at the border from and to the machines of whatever Canadian company receives the contract.

Institution of the new flights is regarded here as a step looking towards a passenger service by air across Canada. In that connection, particular significance is attached to the recent amalgamation of aviation companies into the Canadian Airways, Limited, with Sir Henry Thornton, president of the Canadian National Railways, and E. W. Beatty, K.C., president of the Canadian Pacific Railway, on the board of control.

Wheat Shipment To China

Largest Single Cargo Of Wheat To Leave Canadian Port

Vancouver, B.C.—What is claimed to be the largest single cargo of Canadian wheat to leave a Canadian port will be loaded here for Shanghai delivery aboard the Canadian-American Line steamship "Chief Captain" within the next few days.

The ship will take on 400,000 bushels, or 14,700 tons, and is expected to clear for the Orient by January 5.

Some three months ago the "Chief Captain" carried a cargo of 13,200 tons of wheat to China, this constituting the largest shipment ever made from a Pacific Coast port.

The ship was chartered on a basis of \$3 per ton, and will commence loading early this week.

Farmers Selling Horses

Large Number Purchased For Canning Plants In U.S.

Barrengreen, Wash.—A large number of horses have been sold at Barrengreen—recently, the most of them being purchased by men from the United States, then driven to Great Falls, Montana, where they are to be slaughtered and then canned.

The horses ranged in age from four to 20 years old, and some of them were excellent farm horses. Roy Stewart sold 43 animals at this sale, and among them were a number of good horses. Farmers of the district are getting rid of some of their horses at any price in order to get a little money to tide them over the depression period.

Spouse Ownership In India

New Delhi, India.—Lord Irwin, Viceroy of India, has issued instructions which have the effect of repealing, with certain changes, the press censorship ordinance and also the "unauthorized news-sheet and newspaper ordinance," both of which have recently expired. The Viceroy also promulgated an ordinance concerning the liability for non-payment of taxes.

Imports For Quebec Port

Quebec, Que.—According to figures issued by the Quebec Harbor Commission, 1,048 vessels entered and cleared at this port during the 1936 season of navigation, representing a tonnage of 4,250,000. During the season there were 1,780,000 more bushels of wheat shipped out of the port than in 1935.

Outstanding Journalist Dead

C. A. C. Jennings Was Chief Editor Of Toronto Mail and Empire Twenty-Nine Years

Toronto, Ont.—One of Canada's outstanding journalists, C. A. C. Jennings, chief editor of The Mail and Empire, Toronto morning newspaper, during the last 29 years, and a member of the editorial staff for 30 years, died suddenly at his home here, Dec. 22.

He left his office shortly after 6 o'clock to go home for dinner, but on arriving there complained of pain and constriction in his chest. Talking to his bed, he sank rapidly and died before medical aid arrived.

Friends from leading men in all walks of life poured into the Jennings' home. From Canada's prime minister, Hon. R. B. Bennett, from Ontario's premier, Hon. George E. Henry, and from Hon. G. H. Ferguson, former provincial premier, came messages of regret and tribute, as well as from other associates in political, church and journalistic fields.

Mr. Jennings started his newspaper career with a local trade publication after spending some years as a school teacher. He was born in the tiny hamlet of Cuthel, in Markham township.

A SOLUTION OF INDIAN PROBLEM IS STILL SOUGHT

London, England.—The prime minister of Britain and two women of India united their voices in urging the Hindu and Muslim elements at the round-table conference to come to an agreement on the question of minorities and their representation in the government of the new India.

"Settlement of the minorities question," insisted Mr. Ramsay MacDonald, "is essential to the political progress of India. That is not merely a British view. It is the view held by every enlightened Indian, irrespective of the community to which he belongs.

"It is a question," said the prime minister, "which should be settled between yourselves. It will avail you nothing to start work on an Indian constitution and to ask any outside authority to dictate one of the essential conditions of the successful working of that constitution—namely, the degree and proportion of racial representation."

"The time for emotional speeches has passed," said the Indian Sheh Nawaz, a Moslem. "The time for practical proposals and for solid, constructive work has arrived."

"Now that the all-important time of decision has come," she continued, "is it wise that you remain divided in your own ranks?"

Mrs. Subbarayam, a Hindu, said: "Whatever our creeds, we are all Indians."

Will Serve In British Navy

Senior Naval Officer At Halifax Proceeding To England

Ottawa, Ont.—Commander W. G. Broder, R.C.N., senior naval officer at Halifax, N.S., is proceeding to England on January 2, according to a memorandum issued from the department of national defense. Commander Broder will serve for some time with the Royal Navy.

Lieut. H. Shadforth, Vancouver division of the Royal Canadian Naval Reserve, is appointed as from Jan. 4 to the naval depot ship, H.M.C.S. "Nootka," at Esquimalt, B.C., for 30 days training.

Is Awarded Chair

Ottawa, Ont.—In a British Columbia case involving the sale of the Big Beaver Mine in the Salmon River district, the Supreme Court of Canada awarded William F. Morris, of Port Angeles, Washington, the sum of \$60,000 from the \$200,000 received.

Song Writer Dies

New York—Charles E. Morris, song writer and music publisher, author of "After the Ball," one of the most popular songs ever written, died at his home here after an illness of three weeks. He was 66.

NEW FRIENDS GATHER

Theodore Roosevelt, Jr., upon request of President Roosevelt, has formed a corporation of the University of California, and was leaving the Senate Hall, when a young man among the spectators, said to be a Punjab Hindu student, fired four shots at him point-blank. Mr. Roosevelt was grazed in the neck and leg.

The Punjab governor had attended a convocation of the University of California, and was leaving the Senate Hall, when a young man among the spectators, said to be a Punjab Hindu student, fired four shots at him point-blank. Mr. Roosevelt was grazed in the neck and leg.

Rescued By Dog-Driver

Wife Thrown With Lash From Horse

From Browning

Prince Albert, Sask.—Unerring aim of the whiphand of Clarke Cheney, veteran dog-driver of the north, saved the life of a tractor driver at Lac La Ronge. The tractor driver was hauling a "wring" of salt across Lac La Ronge, 200 miles north of here, when the machine plunged through the ice. Cheney, witness of the accident, hopped his dog team, uncoiled the long, snaky dog whip and whirled it toward the tractor driver who grasped the lash and was hauled to safety.

He was taken to a hospital where his wounds were dressed and he walked home a few minutes later smoking a cigarette.

The assailant was immediately arrested and with him another youth who sprang to his aid when the shots were fired.

Session To Deal With Radio

Will Take Immediate Action On Radio Bill

From Washington

Ottawa, Ont.—Definite action will likely be taken at the next session of parliament to deal with the radio situation in Canada. Hon. Alfred Duranbeck, Minister of Marine, whose department has jurisdiction over radio, is giving careful consideration to the question, which is, admittedly pressing.

He will submit his recommendations to the cabinet which in turn will reach a decision as to the policy to be adopted.

Will Schedule Nitrate

Vancouver, B.C.—Nitrate which in the past has been brought all the way to Canada from the mines of Chile will soon be produced in large quantity in British Columbia as one of the chemical fertilizers to be turned out by the new plant of the Consolidated Mining and Smelting Company at Trail, B.C.

ALL ABOARD FOR SOUTH AMERICA

The two passengers who will now to leave a Canadian port for South America—the new Canadian National liner "Prince Robert"—left from Halifax on March 8, 1937, with a party of Canadian trade delegates, their wives and other passengers. The Canadians will visit several Latin-American countries. Special attention will be paid to Buenos Aires, capital of the Argentine, where the Prince of Wales will open the British Empire Fair which will spread over 20 acres of ground and which will include a handsome Canadian pavilion and seven other British new buildings. Present here are Angus McLean, president of the Canadian Chamber of Commerce, pointing to the "Prince Robert"; also part of staff, and Ernest Davis, president of the Canadian International Association. These two organizations and the Canadian Government are responsible for Canada's part at the fair, one of the largest of its kind ever held in the world. Both Mr. Davis and Mr. McLean and their wives will make the trip.

Prison Governor Wounded

Wife Shoots In Adjacent The Home

London, Ont.—Sir Geoffrey de Montmorency, governor of the Penitentiary, was wounded by bullets from the revolver of a youth who finally wounded a police officer at the same time.

The police officer, sub-inspector Charles Sharp, died in a hospital where he was taken after he was struck by a single shot. A woman physician who was hit by a stray bullet, had received only minor injury.

It was the second time that Sir Geoffrey had been shot at and the attempted slaying occurred just a year from the day that an attempt was made to burn a train carrying the vicere, Lord Irwin and Lady Irwin, to New Delhi.

The Punjab governor had attended a convocation of the University of California, and was leaving the Senate Hall, when a young man among the spectators, said to be a Punjab Hindu student, fired four shots at him point-blank. Mr. Roosevelt was grazed in the neck and leg.

He was taken to a hospital where his wounds were dressed and he walked home a few minutes later smoking a cigarette.

The assailant was immediately arrested and with him another youth who sprang to his aid when the shots were fired.

BORDER CITIES WANT ACTION ON MIGRATION LAW

Ottawa, Ont.—Misunderstanding and ill-will between two friendly peoples are developing from the actions of the United States Bureau of Immigration in violating, in name of "shylock legislation," the agreement of 1927. According to a delegation from the Border Cities Chamber of Commerce who saw the prime minister Dec. 2.

By applying new regulations governing the entry of immigrants between the Border Cities and Detroit, the United States is breaking the spirit of the three-year-old agreement, and is making a "shylock" as to immigrants coming from 18,612 in the year 1927, to 4,600 in December this year. The delegation charged that the United States officials had again launched "an organized and determined campaign of deportation," and as a result of this onslaught, additional Canadians were every day being prohibited entry into the United States for a period of 12 months.

To remedy such a condition of things, the delegation asked the prime minister to make representations through the Canadian legislature at Washington for amendment by the United States Bureau of Immigration of all those measures who have been debarred by legislation.

A second suggestion is that Canada negotiate a treaty with the United States which will clearly define the rights of Canadian and United States citizens in relation to this problem.

The third recommendation to the prime minister suggested "that the Dominion government in any case rapidly develop its fiscal policy to encourage the manufacture of goods in Canada which are now produced in the United States, thus providing additional employment in Canada."

The prime minister gave sympathetic hearing to the representations of the Border Cities men, promising to take up the matter through the Canadian chargé d'affaires at Washington.

Liberals Win By-Election

Government Candidates Losses By Major Margin At Estevan

Estevan, Sask.—In the most interesting by-election ever held in this seat or probably in any constituency in Saskatchewan, Norman McLeod, Liberal, secured a majority of five votes over David McNaught, Conservative, when the outcome of the polling was finally made known. It was the highest vote ever recorded in an Estevan election, provincial or federal.

Thus Estevan remains in the Liberal column, and the Opposition will have 20 seats in the Saskatchewan legislature, as compared with the Liberal government's strength of 24 Conservatives, six Independents and five Progressives. That the Government side will demand a recount is virtually assured.

European Nations

Sig Tariff Pact

We Agree Not To Enter Other Trade and Commercial

Oulu, Finland.—Ottoman Minister of Finance and his delegation are introducing new legislation now more without consulting any nation has been signed and is viewed as a development of great importance in the economic affairs of northern Europe.

The signature of the treaty for "commercial approximation" by representatives of Norway, Sweden, Holland, Belgium, Denmark and Luxembourg was announced by the Norwegian Foreign and Foreign Minister John Lundin Mikkelsen.

Long Service Award

Winnipeg, Man.—George Arnold who for 50 years has been an engineer in passenger trains out of Montreal, has received the longest service ever achieved by a railway engineer in Canada, according to word received here by editor of the Canadian National Railways. The veteran engineer retired at the age of 75.

Mr. G. J. Bryan, barrister, will be at his office tomorrow (Friday) afternoon, on his return from Calgary.

Mr. C. ("Chuck") Chesser, a former resident, now of Mt. Robson, paid Stony a visit on Tuesday.

Little Jimmie Edkins is making a splendid recovery from the effects of his recent accident.

Mr. Herb Wells is up from Heberon, for the holidays.

Mr. Mayor Wright of Edmonton was a visitor to Stony on Tuesday.

Mr. W. Trapp visited a party of friends on a threemonth tour thru the Rockies district.

Mr. G. G. Gordan, of the staff of the Calgary Power Co., spent Christmas with his parents at Coonot, and on Saturday returned to his home at Calgary.

Miss Ursula and Mr. M. Bouldam were present on Tuesday evening at the dance in Strathcona of the former High School pupils.

Mr. Becker, of Strathcona, and Mr. Krahn, Seward, were Friday visitors at the Joe Becker home, in Stony.

Miss Marlene, who taught at the local school this last session, has secured an appointment on the staff of a City school.

Stony's Public and High schools re-open Monday next, Jan. 6th.

Barth's orchestra played at Stony last evening, at the big New Year's Eve dance there.

Then the company of Mr. J. F. Clarke, a member of Stony, had the pleasure Tuesday evening, of listening to the new Victor Radio, from which was coming the Hon. R. B. Bennett's speech, broadcast from Regina.

The much-vaunted winter-lugging batch in town on Monday evening was enjoyed by those privileged to be present. The smaller of the two has challenged his opponent to a further match of their lugging ability.

If you are having visitors during the peasant holidays, or are visiting away yourself, drop in at The Sun office and tell us about it, or send the items thru the post office. The member one half the world is interested in the other half's movements.

Sporting Notes

The Justice hockey team is playing the Stony team today, on the latter's ice.

Up at the Cuthberts, all the interest is centered on the outcome of the contest for the big Hanmerfitter Silver Trophy.

The Bobbyleigh Club had a fine Sunday evening down to Winterhore and other points of interest, on a three-hour trip; when only one touchdown was made. On returning to Stony, lunch was served the members at the Royal Cafe.

Sparks.

The Illustrated Magazine,
Wishes his patrons a Happy New Year.

Spruce Grove News

The risk of curling from the Grove, Messrs. Shewin, Forbes, Connolly, Elmer, are on the President's side, in the curling contest just concluded, up at the Stony Park rink.

Mr. P. Schram has started clearing operations on his North farm, six miles from town.

The effects of Christmas carollers seem not to be appreciated in this district, as the two who met with an accident the night of Dec. 24 are aware.

Some half dozen of the delegates were up to the Stony Plain police court Tuesday, as witnesses in the Shaw-Bedinger case.

Word at the Meeting-Place.

Butcher—And what kind of beef would you like, my dear?

Young Girl—Roast beef, if you please.

Here and There

(123) A British Columbia cannery has recently been awarded a contract to a Hong Kong firm of provision merchants for the shipment of 60,000 bushels of butter per month. For the past eight years shipments of British Columbia butter have been made to Japan and it has sold at a premium in the markets of that country.

With the formal opening of the 146 room Coronation Inn early in December at Kinsville, N.B., the fifteenth hotel was added to the chain of Canadian Pacific Railway hotels from the Atlantic to the Pacific. A grand gala banquet sponsored by the Kinsville Board of Trade at which nearly three hundred guests sat down including the Premier of Nova Scotia and Grant Hall, vice-president of the company marked the opening of the new \$100,000 hotel.

Norman Trebil, of Wimbley, Alta., for the second time took the title of "Wheat King of 1930" when he was awarded top honors at the International Livestock Exposition in Chicago recently with hard red spring. Mr. Trebil is even more satisfied with the third place which he was to hard red winter to which he said he is confident he has demonstrated the feasibility of raising high grade winter wheat in western Canada and that he has moved the winter wheat line 200 miles to the north. An invitation to take a round-the-world cruise has been tendered Mr. Trebil as a mark of appreciation by E. W. Beatty, chairman and president of the Canadian Pacific Railway.

The Province of New Brunswick's revenue from motor vehicles for the fiscal year ended October 31 last amounted to \$1,391,220, being 21 per cent. greater than the receipts from the same source in 1929, and establishing a new high record for the province, according to announcement made by Hon. D. A. Stewart, Minister of Public Works.

An old obligation was recently liquidated by Canada when the sum of \$47,000 was paid to Commander Otto Nordens, famous Norwegian explorer, to return for the services rendered by him in his explorations and discoveries in the Arctic Islands. His researches extended over an area of about 100,000 square miles and have been of great value to Canada.

Latest official report on the field crops of Canada estimates the 1930 wheat crop at 200,000,000 bushels or about 11,000,000 bushels more than the previous official estimate made last September. 274,000,000 bushels were grown in the Prairie Provinces. The crop is about 21,000,000 bushels more than in 1929.

Great increase in pork production in Canada on account of the grain situation was predicted by Hon. Robert Laird, Minister of Agriculture for Canada, at a recent banquet in Toronto given by him to agricultural, business, executive and governmental representatives on behalf of the Royal Winter Fair, Toronto.

The advance part of British Columbia for the 1930 season is nearly 500,000 acres higher than the previous record of 1929. The total crop this year is 3,182,713 acres while in 1929 it was 2,682,472 acres. In 1928 it was 2,093,431 acres.

CHAPTER VII.—Continued.

Later, as they walked back to the Street, Nick pushing the go-cart, and Simon holding the umbrella, Nick said: "I wish you'd take Gay home with you, Uncle Simon. She's not herself; I can't help feeling worried. The other night—" He paused for a moment, while the old man watched him from beneath half-closed lids. "She—she got up by—Well, our next door neighbor was singing. I suppose the music stirred Gay up. It was rather that sort, and she was feeling particularly tired. When we went inside she—cried. I thought she'd never stop. I was scared then. It didn't seem quite natural for a mere song to upset her as much as that."

"Did it upset you, boy?" questioned Simon. His eyes still on Nick's face.

Nick laughed, a short, nervous laugh, and answered: "Well, perhaps it did—a little. I was feeling restless anyhow. It had been a hot day, and the apple blossoms smelled so sweet and—"

"You got pink? See that broad highway you used to talk about?" queried the old man.

A guilty smile beamed on Nick's lips.

"Only for a few minutes, sir. It's not often I think about it these days; but that night—"

"M-m," murmured Simon. "You wife knows you pretty well, don't she?"

Nick raised surprised eyes.

"Why, of course. Who should know me, if not Gay?"

"No one, so far's I know. But isn't it possible that she wasn't as much upset by the music, as she was by knowing that the music had upset you?"

Nick stood stock still.

"Why—it—it never occurred to me!" he said.

"Well, if you was to ask my advice, I'd say maybe you better think about that side of it. That's every man's got a wife like Gay."

"I'll go you out better there, Uncle Simon," said Nick heartily. "I'm the only man in the world with a wife like Gay. The Lord never made a double. But she needs a change. I've known it for some time. Since Jazey Maxwell married and left town Gay's been lonely. I'd hoped our new neighbors would supply the want, but she and Mrs. Halliday don't seem to hit it off very well."

"What about Mrs. Halliday?" asked Uncle Simon; and Nick laughed at the old man's assumption that the fault wouldn't possibly be Gay's.

"Nothing, that I can see. It was the talking with me at the bank when you came in—a pretty little woman in a blue gown. She always wears blue—says it matches her eyes. Pretty eyes, too—trusting, innocent variety. Gay says they're too innocent, but I think she doesn't do the women justice."

"She's got any sister?" asked the old man suddenly.

"Yes—she's a year older than before her age."

"Maybe those innocent blue eyes is what made her cynical," chuckled Simon. "Because like I've heard of such things sometimes before" effect. Well, here we be. You not had ice cream in the cabinet yet you see that, Nick, and I'll see to Honey. I'll have you hungry. Didn't have time for no proper breakfast before I started."

During the meal that followed (and despite Uncle Simon's warning, Gay had a batch of the same muffins she knew he liked), the question of the visit to State Line was broached again.

"You've got to go, dear," said Nick firmly. "I'll do you a world of good, and I'll come for Sunday. It will be a wonderful excuse for me to get away myself."

"Will you come this Sunday?" asked Gay wistfully. She felt suddenly homesick at leaving him at all.

"It's Thursday now, my dear," Nick answered, smiling, "and you can't get off till tomorrow. I'll give you one week of freedom from my company. And you needn't worry about me, Gay. I told Mrs. Halliday I was sending you away, and she suggested my going with them on a trip some Sunday, so I'll be provided for."

"That's very kind of her," said Gay; but her voice was cold, and Nick, rising, went round the table to kiss her cheek.

"If you think," he said, "if you think for one minute that I prefer an auto trip with the Hallidays, in a Sunday at Uncle Simon's with you and the kids, why you haven't the same I give you credit for. But it was kind of Mrs. Halliday to ask me. You must be fair to her, Gay. She just took pity on me. She says Halliday's like a lost soul when she's away."

"And then," said Uncle Simon, in a tactful effort to clear the atmosphere.

"I suppose he sits him down and writes one of these cynical stories that makes a man want to get out his razor and cut his throat! But Nick's right, dear, you need a change of scene; and I need company somethin' terrible. I got a good woman done for me now, and you won't have to raise yer hand except to me to the babies; and if I'm not mistaken, you'll find me some help there. You can stay as long as you want, and I won't urge you to stay a minute longer. As for Nick—maybe livin' in bachelor's hall for a spell will make him appreciate his blonda's."

Nick laughed.

"You bet it will! But I'll try not to mess things up too much, Gay. Don't let that worry you."

"She ain't going to let a damn thing worry her," announced Simon. "Gay, Nick, I'm not goin' to drag them babies forty miles by train in this weather. Is there a man in this poky town who'll carry us over in an automobile—no the Li'lacs, mind you, but somethin' that's got springs? If no I'll interview him this afternoon."

"Sam Hilton's got a good car. He's a good driver, too. I wouldn't trust my family to everybody's driving over those hills. You make him go slowly, Uncle Simon. He can speed all he wants on his way back. Gosh! I wish I were going with you!"

"M-m," murmured Simon; then glancing at Honey he said softly: "Look, follow that baby's sleep over his ice cream!"

It was true. Honey's head had dropped forward, and his eyes were closed.

"That causes skipping his morning nap," said Gay. "Poor little man! I'll carry him upstairs."

But Nick was ahead of her, kissing the boy gently.

"Put him in our bed," she whispered. "Baby's still sleeping in the nursery. Well," she added, as Nick left the room, "if Honey sleeps a while I'll be free to do my packing. I've got a pile of mending a mile high."

"Let it be," said Simon, "and pack it after you get off. Now if you'll just put away the left-over victuals (that's one thing my old woman never let me do), Nick and me'll round up these dishes. And then I'll go back down stairs with him and see about getting transportation. Gosh! I feel like I was startin' out for foreign parts, talkin' a whole family along like this! Sometimes I wonder what I did to 'em! I had you and Nick to bolster with."

Gay smiled. The old man's happiness in the thought of her visit was contagious.

"And I wonder how we'd manage without you to fall back on when we hit. I wish we could paper you, Uncle Simon."

"What about all them Christmases and Thanksgiving's I've spent with you?" he said gently. "Doesn't you like me, mother?" "Yes, Honey, Nick, you take that dish you and I'll wipe. If you're here back I'll make it right with the both of us. And don't you get mother? but crochets are made for bigger, Gay. Mother takes much better on a hot night, and it'll be good practice for Nick—eatin' right. I don't believe he'll get all the rounds of heat while you're off visiting."

"I'll never the left-over," Nick answered, as he rolled up his sleeves, and then patrolled the village back rooms. "But you'll have to kill the fat-tail cold in Sundays, Uncle Simon. I shall have the appetite of a wolf."

"How don't you get all hot and bothered?" advised Simon, as he and Nick were departing for the head of Main Street. "We don't need to start any special fires, and my old woman used to say mother liked her out like a round robin tryin' to get somewhere on schedule. Just you go ahead an' easy like, and maybe I'll have a surprise for you come supper time."

"This seems to be a day of surprises," Gay answered. "It may not have told me this morning that before noon I'd be preparing to desert my husband, I wouldn't have believed him. I don't feel quite right about it even now."

Nick snorted—put his hand beneath her chin—lifted her face and kissed her. He stopped outside, then came back to perform the rite again.

Simon beamed upon them.

"That's right," he said. "Better keep going while the girls' good!"—and opening his huge umbrella he suddenly turned his back.

(To Be Continued.)

Recipes For This Week

(By Betty Barclay)

CHOCOLATE BREAD PUDDING

1 package chocolate flavored Jell-O.
2 slices whole wheat bread — 1/2 inch thick.
Butter.
1 pint milk.
Raisins.

Remove crusts from bread, butter lightly and cut in small cubes. Divide the cubed bread among 4 dessert dishes and add a pint milk and raisins. Prepare Jell-O according to directions on package. Pour at once over bread. Let stand in warm room until firm—about 10 minutes. Then chill.

CINNAMON APPLES

1 jello tablet.
4 medium sized apples.
1 cup sugar.
1/2 teaspoon vanilla.
1 pint milk.
2 tablespoons red cinnamon sugar.
1 tablespoon lemon juice.

Peel and core apples and place in baking pan. Make a syrup by heating the sugar (except 1 tablespoon which is used for the jello), water and cinnamon candle together for 5 minutes; add lemon juice. Pour syrup over apples and bake until tender, heating several times. Place apples in individual dishes, filling the center of each apple with syrup. When cooled, and the syrup has jelled, prepare Jell-O according to directions on package and fill dishes. Let stand in a warm room until firm. Then chill.

Cold Electric Station Industry

Generation of Standard Energy For Public Use

Canada's ancient electric station industry—the generation or distribution of electrical energy for public use—has attained record proportions because the rate of distribution and accessibility of low tension power is such that, with modern means of transmission, new and hydro-electric for industrial applications, and domestic and residential use to all but a small proportion of the population. In addition to remote industrial power, electrical supplies of native fuels contribute a principal source of electricity.

Electric Boxes

Deposits of native mineral products suitable for glass manufacture, are found on the slopes of Lake Superior, Manitoba, as well as at Bismarck, about 30 miles south of the lake.

Milburn's Addition for Frost Bits

Electric Ear Buds Hair

November 1929 to December 1930
Locating Trends in Manufacturing

An electric car with which engineers hope to reduce noise by setting one round to kill another sound has been demonstrated publicly for the first time at Pittsburgh.

This method of noise reduction consists merely in setting two round wheels to interfere. A big obstacle has been the human ear's inability to separate complex tones sufficiently for engineers to find out which one is not natural to either.

The electric car, it was announced, promises to overcome this handicap. Weighing 40 pounds, the size of a suitcase, it consists of attaching to and "locking" to a noisy machine was demonstrated at the Westinghouse Research Laboratories by E. P. Folsom, Westinghouse engineer.

"In a somewhat different application it is also hoped that in the future this new portable car may be used as an advanced fault-finder for telephone lines and propellers," said Folsom.

Household Hints

Commonly Known as Rubber in All Household Household

The most puzzling case of stars in the sky is that known as the Wolf-Rayet, so named because their parent star was discovered by the astronomers Wolf and Rayet at the Paris Observatory in 1867. Observations carried out over a number of years by the Dominion Astrophysical Observatory, Victoria, B.C., have in part clarified the mystery. These stars are continuously and violently shooting off matter in all directions into space. There is a constant stream of stars travelling outward from the stars like a tremendous volcanic eruption over every part of the surface, some of the stars reaching the terrific speed of 1,000 miles a second.

Preference For Feminine

British Government Gives a Preference To Feminine From Supplies

It is the practice of British government departments, in the case of contracts, to give a preference to tenders from the dominion and colonies, as compared with tenders from foreign countries, but only within reasonable limits. This was the reply of the financial secretary to the treasury, F. W. Petrewick-Lawrence, to a questioner in the British House of Commons, who asked whether any preference was exercised in favor of supplies from the Dominions and Overseas provinces, even where such supplies were not the cheapest available.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Powerful Pains To Kill

Pains and many ills can be removed without destroying life. Cataracts, according to ophthalmologists, regularly live after being freed during the winter. One investigator from the grid of the equator between the double-long-longs until they would readily break, and those not broken survived. Pains have been freed in solid ice without killing them.

Milburn's Addition with Frost Bits

Frost Bits For Biting and Wheel

At the recent Royal Winter Fair at Toronto, W. F. Milburn, of Bismarck, Manitoba, won first prize with his new Frost Bits Registered and named after his son, George W. Milburn.

West End Blue in Alberta

Coal was first discovered in Alberta by Michael Sharpen, who opened a mine in 1872 on the west bank of the Old Man River. He broke his own tools, found his own market, and heated coal by an iron to Fort Macleod, Manitoba, and sold it at a profit.

Walking to Jasper

On Friday afternoon last, when one of Edmonton's prominent citizens was motoring, with another gentleman, to his cottage at Somba, and were out several miles from the City, they encountered a man and woman, each carrying a youngster.

The driver stopped the car, took the four aboard, and on inquiring their destination, the man informed him they "were walking to Jasper". Altho slightly staggered by the information, the motorist, on further asking, found this to be true, as the man having become tired of being a burden on friends in the City, and having a brother at the place he named, decided to travel there.

The motorist stopped at the Grove, went over to see Jim Elder, and purchased tickets to Jasper for the quartet. They were then taken to the hotel and given a room to await the coming of the midnight train.

To supplement his kindly action, the Good Samaritan, on returning from Somba in the evening, stopped at the Grove and seen the outfit on the train, giving the man a baseball with an "X" on it.

The motorist's name is Mr. Archie McGavin.

General Motors announces a

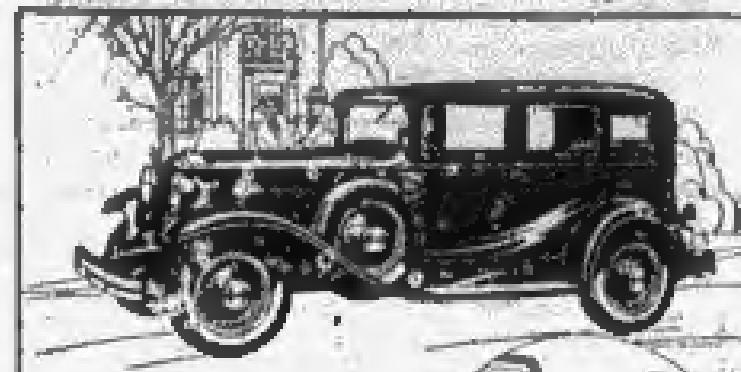

NEW CHEVROLET SIX

Bigger . . . Finer Lower in Price

TODAY General Motors and Chevrolet are proud to present a new Chevrolet Six. The new car has a lengthened, 109-inch wheelbase . . . beautiful new bodies by Fisher . . . de luxe wire wheels . . . and important mechanical improvements. Yet it sells at new reduced prices . . . the lowest at which any Chevrolet has ever been introduced.

With all its new beauty and added value, no departure has been made from the basic principles of six-cylinder operation and extreme economy which have won 2,000,000 owners to the Chevrolet Six . . . and made Chevrolet the world's largest-selling six-cylinder car.

Bigger—finer—lower in price . . . the new Chevrolet Six is now on display at the show-

Royal York Wins Architects' Medal

The Royal York Hotel, Toronto, the largest hotel in the British Empire, is again in the limelight, having won for the seventh time the 1929 Gold Medal awarded by the Royal Architectural Institute of Canada, for the outstanding achievement in the past three years. Sixteen exhibits from various parts of Canada submitted photographs of buildings, within the terms of the competition, to the 55th Annual Exhibition of the Royal Canadian Academy, recently held in Toronto, the prize going to the

Canadian Pacific Railway's great new laundry. Formal presentations will be made to the successful competitors: Messrs. George A. Ross, F.R.I.B.A. and Robert H. Macdonald, F.R.I.B.A. of Montreal (upper left and right); and Messrs. Harry Stewart, F.R.I.B.A., L.L.D., R.C.A., and Ernest H. Bush, F.R.I.B.A., A.R.C.A., of Toronto, (lower left and right), at the next annual meeting of the Institute to be held at Quebec, February 26th and 27th, 1931.
